

 ARMANI / CASA

GEM

Rug

GEM

DESCRIPTION

Rug with loops pile border, available in custom size. The loops pile technique is developed with different heights on the vertical borders only, creating a particular dégradé motif. Density: 100 knots/square inch. The carpet is hand knotted without any child labour.

MADE IN NEPAL.

DIMENSIONS

Custom size

MATERIALS

100% Silk

COLORS

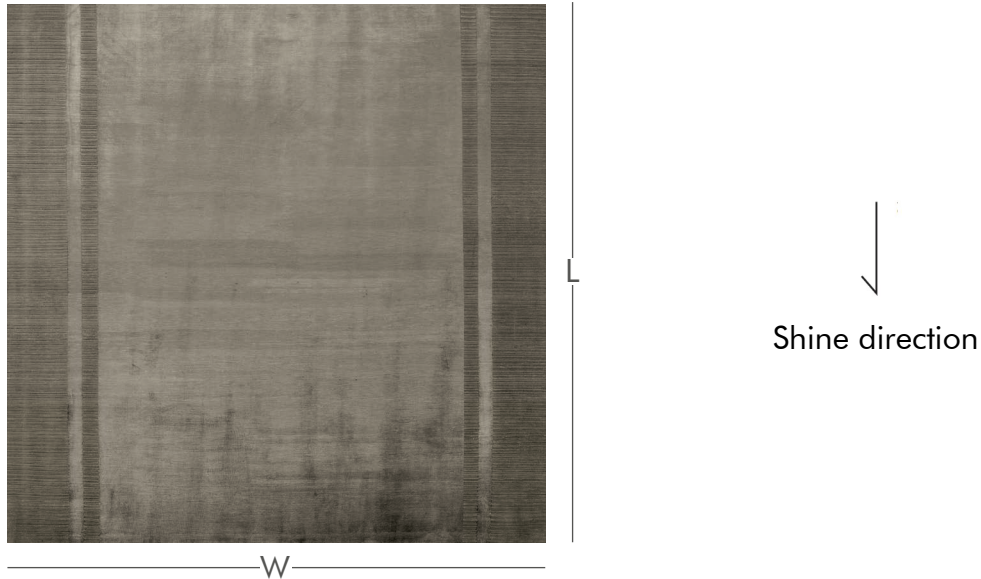

Military

Blue Shadow

DESIGN / PRODUCTION

Design simulation 400 x 400 cm [first dimension always refers to the width]

TECHNICAL INFORMATION

Density and pile height

Density of 100 knots/square inch, pile of 8 mm

Variations

Due to the handmade production process, a size variation of up to 5% in relation to the original size may occur and is not subject to claims.

Squared meter codes

GEM CA213 C1836 (Blue Shadow)

GEM CA213 C2885 (Military)

Rugs exceeding a total of 27 sqm have special prices available on request.

Maintenance

Please refer to the next page for detailed information about maintenance and cleaning.

CARE AND CLEANING

Note: the following tips are only to be taken as a suggested guide. Armani/Casa cannot be considered responsible for damages occurring by the use of these cleaning indications.

Never use bleach or floor polishers on the rugs. Spot cleaning when spills happen:

- Act fast
- Blot - Never rub
- Clean stain - Edge to center
- Do not soak - Pat and fan dry
- Brush pile with a soft brush

If food or liquids spill onto a carpet, blot up the spill as soon as possible. Use only club soda and a clean white towel to soak up the spill. Do not soak the stain. Do not rub, as this will spread the stain. Work the stain from the outer edge to the center. Dry with a fan or hand blow dryer, preferably on a low heat setting. Finally, to restore the pile, brush it with a soft brush. On old stains, repeat the process until they are completely removed. Spills such as mustard, blood and mud should be allowed to dry and then scraped off. Failure in drying the carpet properly can cause mold, mildew and dry rot with significant damage.

Never put a potted plant on a rug as the water can leak onto the rug and damage it.

Special stains

Chewing gum: press ice cubes against spot until it becomes brittle and breaks off. Use spot remover to vanish last traces. Saturate the spot with a cloth soaked in vinegar or alcohol;

Candle wax: place a brown paper bag over the spot. Place a hot iron over the paper bag. Move iron constantly. Wait a few minutes until the wax is absorbed. Repeat if necessary;

Ink from ballpoint pen: saturate the spot with hairspray. Allow to dry. Blot lightly with vinegar and water solution.

For difficult or unlisted stains, please consult with a professional rug cleaner. Never use dry cleaning methods on a wool rug. Never "steam clean" a wool rug as this may cause dyes to bleed. The rugs should be wet-clean by a professional, thoroughly rinsed and allowed to dry completely before being placed on the floor again.

Sunlight fading

Colors fade unevenly and wool and cotton dry out and become brittle. A good rug can be fading in a month or less. When colors are softer or lighter on the pile side of the rug than they are on the back, it means that fading is occurring. You can eliminate or prevent this problem by having your windows professionally coated with mylar (an invisible film which can be applied to your windows and which filters out harmful ultraviolet light).

Moths

Regular maintenance is the best way to prevent your wool rugs from being damaged by moths. Periodic cleaning, moth proofing and rotating rugs are a good way to prevent moth larvae from taking hold and damaging your rugs. When inspecting rugs for moth activity remember to carefully examine the back and perimeters, since most moths can be found there, where they are least likely to be disturbed.

Vacuum and deep cleaning

Vacuum your rug regularly. Sand and grit can work into the base of the pile and abrasion can damage the wool resulting in loss of pile. Vacuum only with suction, never use a beater bar. Every 2-3 years the handknotted rug should be professionally cleaned in a full immersion wet bath to be refreshed and look like new.
